Christina Jones

SOFTWARE ENGINEER

Results-driven, engaged professional with 15+ years of experience providing digital solutions to support communications, user engagement, organizational strategies, knowledge management, marketing goals, and business processes. Proven ability to learn software languages and technologies, adapt to shifting priorities, and build strong relationships with stakeholders. Expertise in developing and managing websites and intranets that prioritize user experience. A trusted partner to internal clients, known for providing detail-oriented plans aligning business needs with technology.

EXPERIENCE

MORE EXPERIENCE ON [LINKEDIN](#)

Cognia

Software Engineer

April 2022 – July 2023

- Modernized a legacy app used to view, filter and sort content organized with specific metadata onto the Mendix platform
- Built Mendix **microflows** to retrieve documents and parsed text via a **REST API**
- Implemented and configured JSON Web Tokens (**JWT**) for authentication
- Developed search functions in microflows using **OQL**
- Converted specs in Figma wireframes to **SCSS** files
- Collaborated with Agile team to build a community website that supports Salesforce data imports, user profile management and forum discussions
- Built client site in Drupal 9 that utilized Okta for SSO

Web Content Manager

February 2009 – March 2022

- Spearheaded intranet development on Drupal platform
- Constructed a Change Request workflow process using SharePoint online, custom **PowerApps** forms, **Power Automate** and **JavaScript**. Collaborated with Program Managers and project stakeholders to convert business requirements into technical solutions; initial launch included **25** active workflows.
- Partnered with various stakeholders to ensure communication strategies aligned with ongoing business changes
- Migrated 50+ SharePoint classic sites to Modern experience
- Evaluated public site usage with Google Analytics and provided strategies to improve **user experience**
- Built custom module to process online payments via AngularJS app and Drupal
- Migrated company website from Drupal 6 to Drupal 7 with responsive UI, resulting in a year-over-year bounce rate reduction of 157% and increase of mobile use by 43%
